# Defining Rules

Rules are a combination of keywords used to filter captured posts in your topic

All of these words

Blackberry

Any of these words

bbm, bb

Not these words

RBT

"Capture all posts with (BLACKBERRY or BBM) and (BLACKBERRY or BB) but exclude all with RBT"

CREATE RULE

NO	ALL OF THESE	ANY OF THESE	EXCLUDE THESE	INFO
1	Blackberry x	bbm x bb x	RBT x	?

# Using the Keyword Suggestion Cloud

SMAC provides real-time suggestions of the keywords related to your rule

Keywords can be used as additional listening filters to track competitors or current issues otherwise passed over

# Capturing Historical Data (BETA)

Get an estimate before spending lines on historical data

### Historical Data

Do you want to pull historical data on these keywords? Use the slider below to get an estimate of how many lines each time period will consume. This data will be added to your topic quota.

1

7

30

**Estimated Volume\***

**809,585**

This is 540% of your quota

\*Volumes are only estimates, actually line consumption may vary

1,7,30 day option

Estimated volume, will count to your 100,000 line quota

Important: Lines are streamed with your incoming current data and are NOT delivered in bulk
